

AZURE USER CREATION

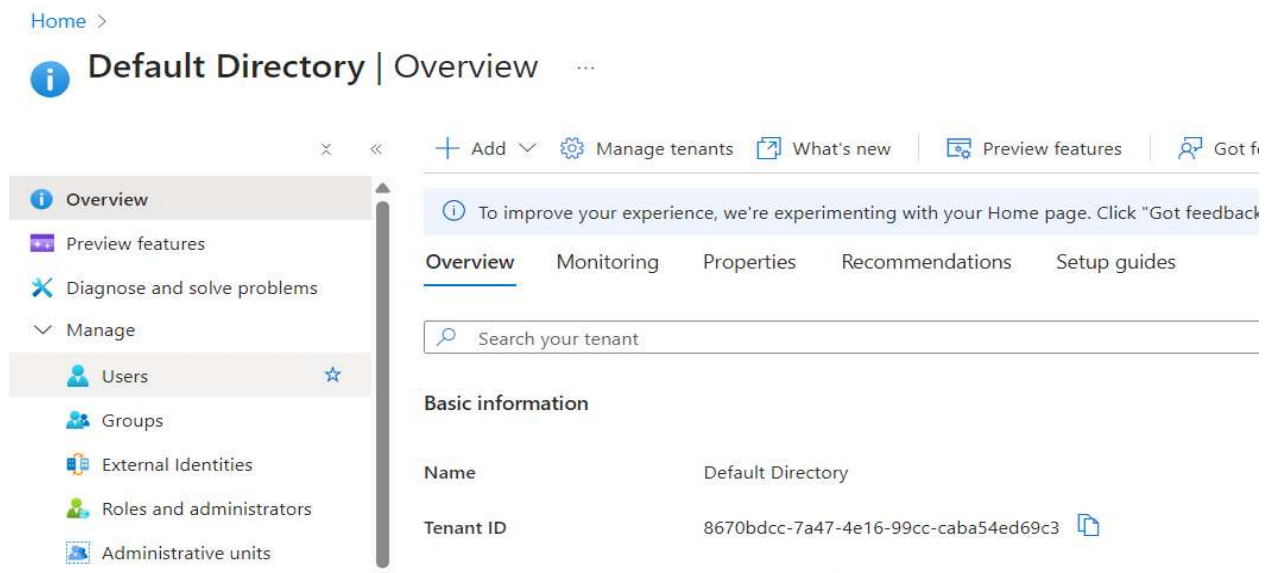

Navigate to Azure Active Directory:

- In the left-hand menu, select **Azure Active Directory**. Or entraid

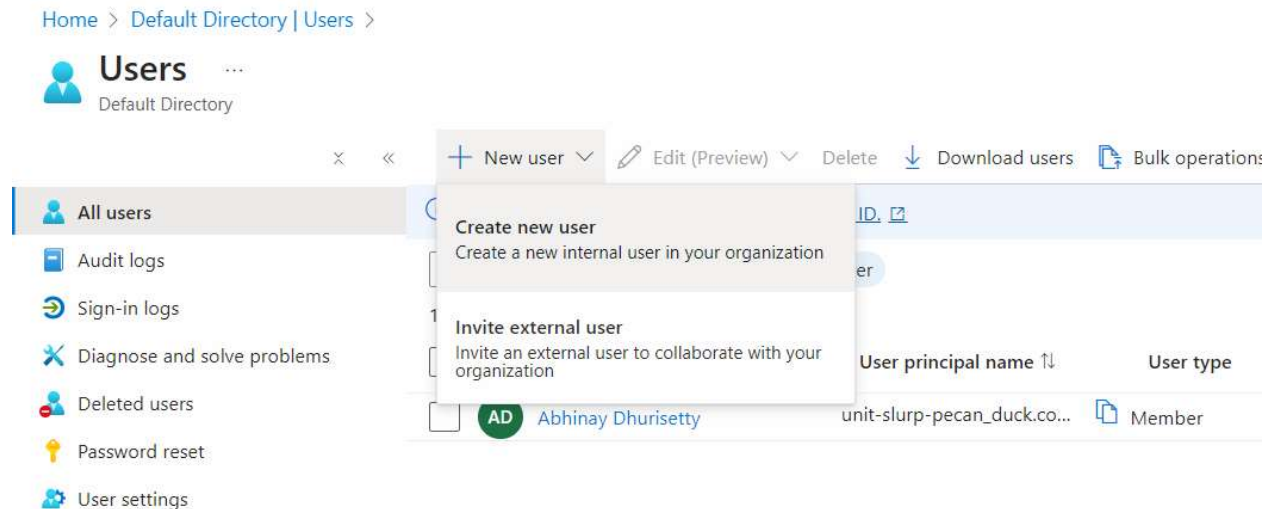

Create a New User:

- Under **Manage**, select **Users** → Click **+ New user**.

Choose **Create user**.

Multicloud with devops by veera nareshit

- Fill in **User Name, Name**, and other required details.
- Untick the auto Assign a **password and give the password** (temporary password will be generated).
- Click on assignments.

The screenshot shows the 'Create new user' form in the Azure AD portal. The breadcrumb navigation is 'Home > Default Directory | Users > Create new user'. The page title is 'Create new user' with a sub-header 'Create a new internal user in your organization'. The form has four tabs: 'Basics', 'Properties', 'Assignments', and 'Review + create'. The 'Basics' tab is active. The form fields are: 'User principal name *' (with input 'veera' and domain dropdown 'unitslurppecanduck.on...'), 'Mail nickname *' (with input 'veera' and a checked box 'Derive from user principal name'), 'Display name *' (with input 'veera-don'), 'Password *' (with a masked input and an unchecked box 'Auto-generate password'), and 'Account enabled' (with a checked box). At the bottom, there are three buttons: 'Review + create', '< Previous', and 'Next: Properties >'.

Create a new user in your organization. This user will have a user name like alice@contoso.com. [Learn more](#)
